

Assessment of **Goal 1, Learning Outcome 1**. Students are expected to demonstrate an overall mastery of the core concepts of public health as it relates to environmental health sciences and display the ability to extend this understanding to relevancy and application to real-world environmental health sciences issues.

**Based on the performance in the PhD Qualifying Exam**, please rate the student's fundamental knowledge of theory and research in:

	Unsatisfactory 1	Marginal 2	Good 3	Very Good 4	Excellent 5
Ecology & Ecosystem Science					
Toxicology					
Environmental Microbiology					
Public Health Practice
