

Secondary Education - Social Studies MAT 2017 - 2018 Assessment Plan

Currently status is: Report Accepted

I. ANNUAL REPORT FOR 2016 - 2017

Mission Statement

Within the mission of the College of Education, the mission of MT and MAT in Secondary Social Studies programs is to prepare professional educators of the highest quality for South Carolina certification as grades 9-12 teachers through a graduate-level program that builds on their undergraduate majors at USC in the social sciences (e.g. history, geography, political science, psychology, etc.).

Goal 1.

TBD

Curriculum

Included in the attached Secondary Social Studies Matrix.

Learning Outcome 1.

Standard 1. Content Knowledge Candidates demonstrate knowledge of social studies disciplines. Candidates are knowledgeable of disciplinary concepts, facts, and tools; structures of inquiry; and forms of representation.

Measures and Criteria

Praxis State Licensure Exam- 80% pass rate

Course Grades

Methods

Data are maintained on this program in the College of Education Chalk and Wire assessment management system (maintained by program faculty and the Office of Assessment and Accreditation). Data from courses are submitted into the system by instructors or other appropriate personnel throughout the semester.

A Data Summary Report which summarizes the data is provided to the program each semester by the Office of Assessment and Accreditation. In addition, faculty receive annual reports on data from surveys of interns, coaching teachers, and supervisors, and data from surveys of graduates. Data are analyzed by faculty with recommendations for program change annually as described here:

The Secondary Social Studies Program faculty along with College of Arts & Sciences faculty member (Dr. Dianne Johnson Feelings) will analyze a summary of key assessment data at least once annually. A further collaborative analysis will take place once every three years when data will be analyzed by the faculty and College of Arts &

Sciences faculty and university supervisors. The questions guiding analysis of data will be:

* To what extent do candidates demonstrate the elements of the USC Conceptual Framework (CF) and meet the standards of the NCSS at admission, midpoint, and program completion?

* What do our candidates clearly do well and in what areas do they need more assistance?

* What changes can be made in the program to assist candidates to be as prepared as possible as high school science teachers?

Besides being used for ongoing program assessment, Program Assessment Plans, Data Summary Sheets, and Program Change Forms are

* Submitted annually to the USC Office of Institutional Research, Assessment, and Analytics via the COE Office of Assessment and Accreditation

* Reviewed by the Professional Education Unit's Quality Assurance Committee in the rotation review cycle (at least once every three years or more frequently, as needed, to meet assessment standards)

* Used to develop program reports for the Specialized Professional Associations (e.g., ACEI, NCTM) once every seven years

* Included in the CAEP review (once every seven years)

Results

Overall, 80% of students successfully pass the Praxis. M.A.T. students perform slightly better than M.T. Our goal is to have 100% of students successfully pass Praxis before completing the program.

Use of Results

Beginning in the summer 2018, an assignment was designed and given to students in the MT and MAT program. The assignment required students to take the Praxis II (Content) and then design a study plan for strengthening their performance. Spring 2019 data on Praxis State Licensure Exams for these students will be compared to previous years to determine if this was effective intervention in improving scores. Having the data sooner would inform program advising and selection of graduate content area courses to support student's mastery of content. This assessment activity aligns with the program SPA (National Council for the Social Studies) standards for educator preparation programs and serves as important measure of student content knowledge.

Learning Outcome 2.

Standard 2. Application of Content Through Planning Candidates plan learning sequences that leverage social studies knowledge and literacies, technology, and theory and research to support the civic competence of learners.

Measures and Criteria

ADEPT Evaluation/Student Teaching Evaluation- 80% to earn a score of meets or above

Inquiry Design Model/ Unit Plan- 100% earning a score of 80% or better

Methods

Data are maintained on this program in the College of Education Chalk and Wire assessment management system (maintained by program faculty and the Office of Assessment and Accreditation). Data from courses are submitted into the system by instructors or other appropriate personnel throughout the semester.

A Data Summary Report which summarizes the data is provided to the program each semester by the Office of Assessment and Accreditation. In addition, faculty receive annual reports on data from surveys of interns, coaching teachers, and supervisors, and data from surveys of graduates. This assessment activity aligns with the program SPA (National Council for the Social Studies) standards for educator preparation programs and serves as important measure of student content knowledge.

Learning Outcome 3.

Standard 3. Design and Implementation of Instruction and

Assessment Candidates design and implement instruction and authentic assessments, informed by data literacy and learner self-assessment, that promote civic competence.

Measures and Criteria

ADEPT Evaluation/Student Teaching Evaluation- 80% to earn a score of meets or above

Assessment Analysis/Pre and Post Assessment Assignment/Candidate Impact on Student Learning- 100% earning 80% or better

Inquiry Design Model/ Unit Plan- 100% earning 80% or better

II. FUTURE ASSESSMENT PLAN FOR 2017 - 2018

Mission Statement

Within the mission of the College of Education, the mission of MT and MAT in Secondary Social Studies programs is to prepare professional educators of the highest quality for South Carolina certification as grades 9-12 teachers through a graduate-level program that builds on their undergraduate majors at USC in the social sciences (e.g. history, geography, political science, psychology, etc.).

Goal 1.

The Master of Arts in Teaching Social Studies Secondary Education is offered jointly by the College of Education and the College of Arts and Sciences. This degree prepares students for initial certification as a high school social studies teacher. The program's course work is designed to further build content knowledge, provide the student with real-life student teaching experiences, and confer practical information about pedagogy and classroom management.

Secondary Social Studies Matrix

Curriculum

Included in the attached Secondary Social Studies Matrix.

Learning Outcome 1.

Standard 1. Content Knowledge Candidates demonstrate knowledge of social studies disciplines. Candidates are knowledgeable of disciplinary concepts, facts, and tools; structures of inquiry; and forms of representation.
