Focused Report

Core Requirement 2.7.4

The institution provides instruction for all course work required for at least one degree program at each level at which it awards degrees. If the institution does not provide instruction for all such course work and (1) makes arrangements for some instruction to be provided by other accredited institutions or entities through contracts or consortia or (2) uses some other alternative approach to meeting this requirement, the alternative approach must be approved by the Commission on Colleges. In both cases, the institution demonstrates that it controls all aspects of its educational program.

Judgment: Compliant

Response:

The University of South Carolina is a comprehensive research university with degree programs at the associates, bachelors, masters, professional, and doctoral levels. The University provides instruction for all course work at all levels for which a degree may be earned. The number of degrees awarded for programs in which all instruction is provided within the University System is available within the University's **Fact Books, by campus** and **by colleges and schools**. The **Degrees Awarded Report** shows the number of graduates in every program offered in the University System for the Spring 2010 semester. **Academic Bulletins** provide a listing of all degree-granting programs and associated course work requirements for the **undergraduate and graduate programs** and for the **Law, Medicine, and Pharmacy** programs offered at the Columbia campus, as well as for those offered at the **Lancaster, Salkehatchie, Sumter, and Union** campuses. The Bulletin Course Descriptions list all courses offered at USC. The **Master Schedule** provides further evidence that all instruction required for all programs at all levels is provided by Columbia and the regional campuses.
