

- If the institution offers distance education programs or courses, how does it determine whether it has appropriate state authorization for out-of-state students?
- If the institution offers degrees internationally, what is the evidence of authorization by each country?
- Is the institution required to report changes in program offerings to the agencies? If so, when was the last report filed?

Sample Documentation

- Copies of the official charter enabling legislation, or other legal document granting the institution degree-granting authority.
- Official documentation of what authority is needed in the state (e.g., wording of a statute delegating power to the secretary of state or to a higher education governing board).
- Additional information establishing the extent of the degree-granting authority, including any conditions attached.
- Additional information establishing operating authority for out-of-state sites, out-of-state distance education students, and international sites.

- 3.1.b** An institution seeking to gain or maintain accredited status offers all coursework required for at least one degree program at each level at which it awards degrees. (For exceptions, see SACSCOC policy [Core Requirement 2.3: Documenting an Alternative Approach](#).) (*Coursework for degrees*) [CR]

Rationale and Notes

Because SACSCOC accredits only degree-granting institutions, the general expectation is that the institution has the capability to offer the range of coursework necessary for a student to earn the degree. Of course, this does not preclude an institution from having partnerships and consortial agreements, accepting coursework for transfer of credit, and the like. But for at least one degree program at each degree level at which the institution offers degrees (associate, baccalaureate, master's, education specialist, and/or doctoral), the expectation is that a student could earn the degree by coursework offered solely by the accredited institution. The rationale for this standard is that this

level of program involvement is needed to ensure quality of the institution's educational programs, to maintain the integrity of each level of degrees offered, and to fulfill the institution's mission as a degree-granting higher education provider.

There are circumstances whereby SACSCOC will allow exceptions to this standard. However, when part of the instruction is provided by another institution, or through some other means (e.g., experiential education), the institution must demonstrate that it maintains appropriate control over the quality of such programs, and the alternative approach must be approved by the SACSCOC Board of Trustees.

The rationale for an alternative approach is that if the institution makes arrangements for some instruction to be provided by other accredited institutions or entities through contracts or consortia, or uses some other alternative approach to meeting this requirement, the institution may still be capable of demonstrating that it controls all aspects of its educational program. In accord with Commission policy "Standard 3.1.b: Documenting an Alternative Approach," an institution may choose to offer a degree program at a level at which it does not provide instruction for all coursework for at least one degree program. For example, a health science center generally can document that it meets this standard for its master's and doctoral degrees. However, the institution may wish to offer a bachelor of science in nursing, but it does not offer any general education coursework on its own. Instead, it may choose to enter into a consortium or contractual arrangement or use another alternative approach by which it accepts from other sources the appropriate general education coursework required for the degree.

In order to gain approval from the SACSCOC Board of Trustees for such arrangements, the institution describes the arrangement and demonstrates that, although it does not offer all coursework for the program or programs at a particular degree level, it assumes responsibility for and maintains control of all aspects of the degree program or programs. It is important that the institution assesses the competencies of students relative to the coursework accepted from another source and ensures that the learning outcomes are consistent with expected outcomes had the institution offered the coursework. The responsibility for the integrity of programs or coursework accepted through an alternative means rests with the institution awarding the degree.

NOTE

Institutions already holding SACSCOC accreditation with an approved alternative approach for this standard do not need to address this standard unless the underlying conditions have changed. However, if the previously approved alternative approach is directly relevant to a different standard, that standard's narrative should include an explanation of how the alternative approach ensures compliance. For example, if an institution offers baccalaureate degrees but has an approved alternative approach whereby it does not itself offer any general education courses (e.g., a health science center), the institution would be expected to document its compliance for Standards 9.3 (General education requirements) and 8.2.c (Student outcomes: general education). It does not, however, need to re-seek approval for an alternative approach.

Cross-References to Other Related Standards/Requirements, If Applicable

Standard 10.9 (Cooperative academic arrangements)

3.1.c An institution seeking to gain or maintain accredited status is in operation and has students enrolled in degree programs. (*Continuous operation*) [CR]

Rationale and Notes

SACSCOC accredits degree-granting institutions in the southern region of the United States and degree-granting institutions operating at select international locations. SACSCOC does not accredit institutions based on their anticipation of becoming a degree-granting institution. In order to be evaluated for accreditation by the Commission, an institution needs to be a functioning organization with students enrolled in degree programs.

NOTE

Institutions already holding SACSCOC accreditation do not need to address this standard unless the institution currently is not operating.

Questions to Consider

- When did the institution first begin offering coursework to degree-seeking students?
- Have there been periods where the institution had no students or offered no courses, other than breaks between terms? If so, explain.
- How many students are currently enrolled in degree programs?

Sample Documentation

- List of degrees offered and current enrollment numbers.
